

“Vides projekti” Ltd. was established in 1997 with a goal to prepare and implement projects of the Ministry of Environment and Regional Development of the Republic of Latvia. Today “Vides projekti” Ltd. is an independent and growing enterprise, which attracts resources from different financial institutions to solve the environmental problems that are important to Latvia. Our clients are ministries and municipalities, as well as state and local government institutions.

During the ten years of its operation “Vides projekti” has implemented more than 50 projects in the field of water and waste management, power industry, economics and construction, as well as informative technologies and ecotourism. It has also carried out a list of projects in the environmental education.
